Asset Preset

The preset dropdown is the primary control. Selecting a preset loads a complete, backtested parameter set. All manual fields below are ignored when a preset is active.

Preset	Timeframe
SUI H2	H2
1000SATS H1	H1
ETH H2	H2
BRETT H2	H2
ZEC H2	H2
XAG H2	H2
BTC H2	H2
BTC H1	H1
RIVER H1	H1
RIVER H2	H2
NEAR H2	H2
NEAR H3	H3
DOGE H2	H2
DOGE H4	H4
PEPE H2	H2
PEPE H6	H6
SIREN M10	M10 (Long Only)
SIREN H1	H1 (Long Only)
Manual	가

Additional asset presets are added with each update.

“ Manual ”

(Manual)

These fields are only active when Preset = Manual . With any other preset, these values are overridden automatically.

Channel Length	20	
Stop Loss %	5.0	, 가
Take Profit %	12.0	, 가
Trail %	3.0	Trailing stop distance from highest/lowest point since entry
Allow Long	On	
Allow Short	On	

Dynamic Sizing (Manual mode only)

Optional position sizing that scales trade size based on recent win/loss streaks. Enabled by default in the ZEC and XAG presets.

--	--	--

Dynamic Sizing active	Off	
Base Size USDT	500	
Win Scale %	10	가 ()
Max Win Scales	3	
Loss Reduce %	15
